Business Description

- Formerly Schering AG, the company was taken over by Bayer in December 2006 and renamed Bayer Schering Pharma AG. It is a global pharmaceutical company that leads in four business areas: diagnostic imaging, specialized therapeutics, oncology, and gynecology & andrology. The company's main business unit is gynecology & andrology, and its flagship product is Jazmin®, an oral contraceptive.
- The company has eight research and development facilities in Europe, the United States, and Japan. It has production facilities in Europe, the United States, Asia, and Latin America; and sales in more than 100 countries around the world.
- Schering AG was incorporated in Germany in 1851 and currently has more than 150 subsidiaries and a workforce of over 24,000 people. The company was listed on the New York Stock Exchange in 2000 (SHRGY.PK).

Products and Services

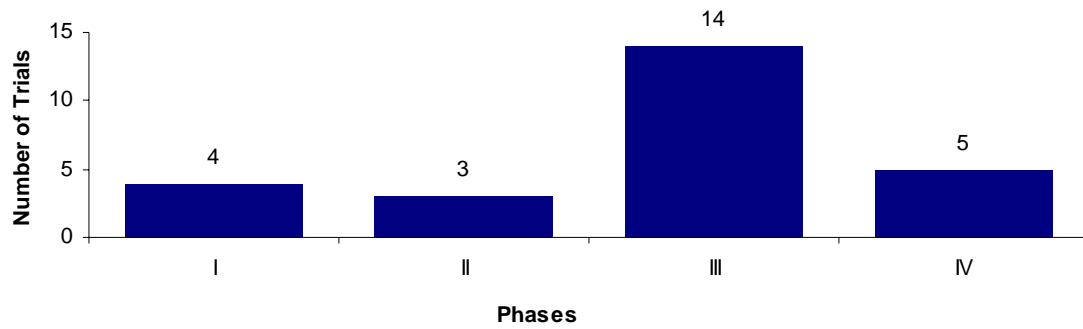

- Schering AG offers a wide variety of products in its four business units.
- In the gynecology & andrology unit, the company focuses on contraceptive methods, menopause management, and testosterone therapy, with products such as Yasmin®, Yasminelle®, Mirena®, Angeliq®, C Pro®, Nebido®, and Testogel®.
- In the diagnostic imaging unit, the company focuses on Magnetic Resonance Imaging (MRI), X-ray, and application technologies for contrast agents with products such as Magnevist®, Gadovist®, Primovist®, Resovist®, Vasovist®, Ultravist®, Iopamiron®, Solaris®, and Stellant®.
- In the specialized therapeutics unit, the company focuses on drugs for multiple sclerosis such as Betaferon®.
- In the oncology unit, the company focuses on drugs for hematology and hard tumors with products such as Fludara®, Campath®, Zevalin®, Leukine®, and Bonefos®.

Intellectual Property

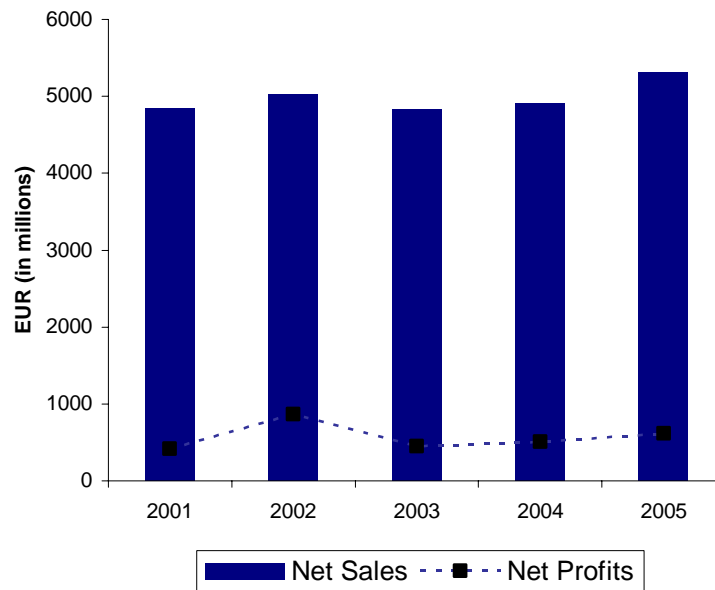

- Schering AG has over 155 patents in the United States relating to the use of its products, technologies, and processes.
- It also has patents on drug applications that are valid all over the world.
